

Creating and Managing Student Records Using Stored Procedures

```
Create database record;
USE record;
CREATE TABLE Students (
StudentID INT AUTO_INCREMENT PRIMARY KEY,
StudentName VARCHAR(100) NOT NULL,
Age INT NOT NULL,
Gender VARCHAR(10),
EnrollmentDate DATE NOT NULL
);

DELIMITER $$
CREATE PROCEDURE InsertStudent(
IN p_StudentName VARCHAR(100),
IN p_Age INT,
IN p_Gender VARCHAR(10),
IN p_EnrollmentDate DATE
)
BEGIN
INSERT INTO Students (StudentName, Age, Gender, EnrollmentDate)
VALUES (p_StudentName, p_Age, p_Gender, p_EnrollmentDate);
END $$
DELIMITER ;
DELIMITER $$
CREATE PROCEDURE UpdateStudent(
IN p_StudentID INT,
IN p_StudentName VARCHAR(100),
IN p_Age INT,
IN p_Gender VARCHAR(10),
IN p_EnrollmentDate DATE
)
BEGIN
UPDATE Students
SET StudentName = p_StudentName,
Age = p_Age,
Gender = p_Gender,
EnrollmentDate = p_EnrollmentDate
WHERE StudentID = p_StudentID;
END $$
DELIMITER ;
CALL InsertStudent('John Doe', 20, 'Male', '2024-01-01');
```

```
CALL InsertStudent('Alice Smith', 22, 'Female', '2023-09-15');
SELECT * FROM Students;
CALL UpdateStudent(1, 'Jane Doe', 21, 'Female', '2024-01-01');
SELECT * FROM Students;
CALL DeleteStudent(1);
SELECT * FROM Students;
```

output
